Business cards as per arrangement ac-
cording to space.

Transient Ads, such as Legal Notices,
By-Laws, Tenders, Notice of Meetings, etc.,
10 cents per line first insertion, and 5 cents
each subsequent insertion, solid nonpareil
measuring.

Leading notices in local columns 10 cents
per line each insertion.

Advertisements of Wages, To Let, Found,
Astray, etc., 50c for first insertion, 25c for
each subsequent insertion. This class of
ads. must be accompanied by cash to insure
publication.

Church Notices and Society Entertain-
ments from which a revenue is to be derived
will be charged for at the rate of 10 cents
per line.

Rates for Commercial, Contract and Per-
manent advertisements will be furnished on
application.

The publisher reserves the right to refuse
to insert advertisements of a questionable or
objectionable character.

A liberal commission allowed to parties
willing to act as agents for us. Write for
terms.

S. T. SCOTT,
Editor and Proprietor.

THURSDAY, OCT. 1, 1896.

The Exhibition.

Before another issue of this paper
the eleventh annual exhibition of
the South Qu'Appelle Agricultural
society will have taken place. The
directors this year have spared
neither time nor expense in en-
deavouring to make this the exhibi-
tion of the west. It remains with
exhibitors now to do their part,
and we expect they will. This
year Providence has smiled upon
the labors of the husbandman and
we expect a great show of cereals,
roots, etc., such as has not been
exhibited in years. Besides the
large number of prizes offered, quite
a number of specials have been
offered in the various departments.

The directors have added to the
prize list this year a valuable map
of the municipality, also a number
of prize essays.

The Experimental farm will also
exhibit here this year. The atten-
tion of exhibitors is called to rule
24—judging exhibits—which will
commence in the hall at 11 a.m.,
sharp and the judging of live stock
at 12 noon. Exhibitors are re-
quested to send in their entries as
early as possible and not wait till
the last moment; at present they
are coming in slowly.

We clip the following from an
exchange, which we think a few of
our advertisers should read, ponder
over and inwardly digest:

We would be pleased if a few of
our advertisers would interest them-
selves a little more in their adver-
tisements. An advertisement never
changed is not a very profitable one,
and we would like to see our ad-
vertisers get extra good value for
their money. It ought to be a
pleasure to tell the people weekly
about your business, and ask them
for patronage. Readers would look
for your advt. to see what you had
to say, and it would be the means
of bringing people to our town. A
space in a newspaper, if properly

used, can be made most valuable to
an advertiser; and a man engaged
in business of any kind in a small
town, is at a great disadvantage if
he has no opportunity of talking to
the people through the press. If a
man is interested in his business
and trying to make it a success, he
will find that the newspaper is a
great help to him, and if he would
sit down now and again and write
out an interesting ad. he would
soon discover that ad. writing was a
delightful occupation, and he would
become so enamored of it that he
would keep right at it, and as a
consequence his business would in-
crease and the newspaper would be
more interesting.

A tale which will long live in
song and oratory is that of the sink-
ing of the German gunboat Idis on
the Chinese coast, how when all
hope seemed lost the captain called
the men together to outshoot the
roaring sea with three cheers for the
Emperor and how after the vessel
collapsed the men, clinging to the
tangled rigging, sang their national
anthem as the one thing they had
all in common and so met the de-
vouring wave. Here is a recital
which will be worth to the German
army and navy more than many
gunboats with their crews. Though
Napoleon Bonaparte said that he
had always noticed that the Al-
mighty was on the side of the larger
battalions, the moral forces are ever
stronger than the physical. In the
greatest war that is being waged on
earth—that which will result in the
universal reign of the kingdom of
God—the victories are all immola-
tions of which the cross of the con-
queror is the centre and type.

Mr. C. Brathwaite, who has
been one of the representative
farmers on the western grain board
for the past few years, has been
omitted this season. The following
gentlemen have been selected, the
composition of the board being
changed from that announced some
days ago: Farmers, W. Postleth-
wait, Brandon; J. Elder, Virden;
J. Riddle, Rosebank; C. Castle,
Foxton; J. McQueen, Carleton Place;
P. Ferguson, Kenos; R. McPherson,
Moosemin; millers, C. B. Watts
and McLaughlin, Toronto; T. A.
Crowe, Montreal; S. C. Elkington,
N.W.T.; Finlay Young, Killarney;
dealers, S. Spink, J. Mitchell, Wi-
nipeg; K. Campbell, Brandon; J.
Carruthers, Montreal.

Mr. W. H. Bell who has just re-
turned from the Kootenay country,
says business is brisk, but that
the market created by the mining
industry for farm produce is not
benefitting our western farmers as
it should on account of the high
freight rates. He says there is any
amount of grumbling among the
Canadians to see the trade which
should be theirs all going to Spo-
kane, on the other side of the line.
To prevent this state of affairs the
government is urged to hasten the
building of a railway through the
Crow's Nest Pass.

A farmer says: Threshers should
clean their threshing machines be-
fore leaving one farm for another.
This is easily done by running two
or three forkfuls of hay through
the machine. In this way noxious
weeds would not be so easily spread.
Unless farmers and threshers take
more care in the future than they
have in the past, this part of the
country will be overrun with weeds
of all kinds.

In the Lieut.-Governor's speech
from the throne in referring to our
district he said, "The yield of wheat
will be 17,000 bushels, grading very
high." We think this must be an
error. Last year there were in the
neighborhood of 200,000 bushels
shipped from this point alone, to
say nothing of Indian Head.

Word has reached here that Pre-
mier Laurier will announce the
name of the new minister of the
interior towards the end of next
week. Hon. Mr. Sifton, the attor-
ney-general, will be the man, and
after the convention of Brandon
Liberals, which will be held on Oct.
6, Mr. Sifton will leave for Ottawa.

The second session of the third
legislative assembly of the North-
west Territories was opened Tues-
day by His Honor Lieut.-Governor
Mackintosh, with the usual formal-
ities. The only change in the mem-
bership of the assembly is in the
Edmonton district, where Mr. Mc-
Auley succeeds Mr. Oliver, who
was elected to the Commons.

His Honor in his speech from the
throne reviewed the encouraging
prospects of the entire country.
He was pleased at the satisfactory
reports concerning crops and cattle.
In the Qu'Appelle district the wheat
crop acreage is about 20 per cent
larger than last year, and the
average yield for the whole district
will be about 20 bushels per acre
of wheat, 30 of oats and 30 of
barley. The yield of wheat will
be about 17,000 bushels, grading
very high. A slight frost occurring
on the night of the 9th did some
injury to the wheat, but 90 per
cent having been cut was out of
danger. Stock and dairy cattle are
in good condition. About 1,000
head of cattle have been shipped
from Qu'Appelle Station this season.
The creamery manufactured about
30,000 lbs. of butter, which found
ready sale in British Columbia
markets.

In Fort Qu'Appelle district the
wheat crop throughout is reported
to be without exception the finest
in its history. The yield is from 20
to 30 bushels per acre, an on sum-
mer fallow 40 bushels per acre.
Other crops satisfactory.

Altogether the agricultural and
stock-raising industries throughout
the Northwest are eminently satis-
factory, and although the cereal
crops are not as large as in some
other years other branches of farm-
ing industry have permanently im-
proved.

C. P. R. Operator's Strike.

The news of the strike of the
C. P. R. operators on Tuesday morn-
ing came as a surprise to our citi-
zens and has caused uneasiness to
shippers, as stock cars and freight
cars are tied up at inconvenient points.
Until to-day passenger trains have
arrived on time. This morning,
however, the train from the east
did not arrive until twelve o'clock.
The operators at this place are still
on duty, but at Indian Head the office
is closed and extra hung on the
door.

The feeling that higher wages
should be paid to operators all over
the C. P. R. system has existed
amongst the followers of that busi-
ness for some time, and the plan of
the action which they have taken to
consider their rights has been se-
cretely carried out and well manipu-
lated from an executive point of
view.

The commercial branch of the C.
P. R. telegraph service is not affected
by the strike, the trouble being con-
fined entirely to the railway opera-
tors.

The position is most awkward at
this particular season and it is to
be hoped the company will accede
to the demands of the men or come
to some amicable arrangement so
that business may go on and the
public put to no further incon-
venience.

J. Paterson Dead.

The news of the death of Mr.
John Paterson, Jr., local manager
of the Commercial Union Assurance
company, Winnipeg, came as a
great shock to his many friends
yesterday morning. The gentleman
had been suffering from the effects
of an injury to the knee joint,
caused by a fall from his bicycle on
the 20th of August last. No great
danger was apprehended by his
physicians, Drs. Simpson and Mont-
gomery, and in fact he had recovered
sufficiently to leave his home last
Sunday for a short time. On re-
turning he complained of not feel-
ing quite so well, and it was then
discovered that symptoms of heart
failure had begun to manifest them-
selves. On Monday morning Mr.
Paterson began to feel quite him-
self again, and it was then con-
fidently expected that the attack
would pass off as it showed no signs

of returning. About midnight, how-
ever, a return of the symptom was
noticed. Coming on morning heart
failure set in in an intensified form,
and Mr. Paterson breathed his last
at five o'clock.

The late Mr. Paterson was identi-
fied with all kinds of sport. He
was a keen curler, being a member
of the Granite club since its organi-
zation, and was also a representative
of the Manitoba branch association.
Some years ago, when baseball was
at its zenith in the city, it had no
greater admirer or supporter than
Mr. Paterson, who was an active
member of the Metropolitan club.
Mr. Paterson was a member of the
St. Andrew's society of this city, for
many years, and worshipped at
Knox Presbyterian church. The
deceased belonged to Manitoba
Lodge No. 1, of Foresters.

Mr. Paterson was a little over 35
years old at the time of his demise,
and came from Woodstock, Ont.,
where he was born. He married a
Miss Stevens about six years ago,
but leaves no family. He leaves
behind him to mourn his loss, his
father and mother, a brother who is
mining engineer in Pittsburgh, Pa.,
another, the Rev. Robert Paterson,
pastor of the Presbyterian church at
Neepawa, besides a younger
brother who resides in the city. Mr.
Paterson has two sisters both still
living, Mrs. Fleming, who resides
at Deloraine, and Mrs. Walker of
this city.—Winnipeg Nor'Wester.

Prairie Fires.

This is the season of the year
above all others when farmers most
need to protect the fruits of their
labor. In spite of the daily warn-
ings there are plenty of farmers
who do not sufficiently protect their
property. A year ago we had oc-
casion to take a drive out into the
country and saw some fire guards(?)
two or three furrows hastily plowed
around some stacks. A fire ac-
companied by little or no wind
would readily have leaped this
barrier. If a thing is worth doing,
it's worth well, especially making
fire guards. Yet some people won-
der why they can't make farming
pay!

The Tree of Knowledge.

A trial was recently made in
Austria to decide in how short a
space of time living trees could be
converted into newspapers. At El-
senthal, on April 17, at 7:35 in the
morning three trees were sawn
down; at 9:34 the wood, having
been stripped of bark, cut up and
converted into pulp, became paper,
and passed from the factory to the
press, from whence the first printed
and folded copy was issued at ten
o'clock. So that in 145 minutes
the tree had become newspapers.
The age of miracles is not past—
Westminster Gazette.

To Subscribers.

Look at the date on the address of your
paper. It shows when your subscrip-
tion expired or expires. If it appears please re-
mind, even a part of what you owe, as a
voucher of good faith. A change in the
date on label will indicate that the money
has reached us. If change is not made
within the first two weeks following the
date of your remittance please notify us.

IT PUT NEW LIFE IN ME.

"ALL I DID WAS JUST TO MOVE AROUND"
"SCOTT'S SASSAPARILLA CURED ME."

The chilly weather of late fall and
early winter finds them unprepared to
ward the change and hence they suf-
fer. This fact is plainly proved by the
following opinions of some who speak
from practical experience:

"I felt like a man that could commit
suicide. I caught a cold while camp-
ing on damp ground, had twinges of
acid muscular pains, couldn't eat and
couldn't sleep. All I did was to move
around and make all in the house as
unpleasant as myself. Scott's Sassa-
parilla put new life in me, healed me up
thoroughly, and since its use pain is a
stranger to me." Alex Grant, Toronto.

J. T. McGraw, a mining prospector,
writing from Menden: "I've seen three
bottles Scott's Sassa-parilla here before
Saturday. Have been a martyr to
rheumatism and indigestion been cured
by exposure. Scott's Sassa-parilla is
rapidly curing me."

Nothing has ever equalled Scott's
Sassa-parilla for building up the system,
purifying the blood in healthy circula-
tion and invigorating the body. These
results testify to its splendid effects in
extreme weakness and all debilitating
diseases. On this account no imitation
of Scott's should be accepted. Of your
best druggists at \$1 per bottle, 6 bot-
tles \$5.

QU'APPELLE PROGRESS.

Thursday, October 1, 1896.

THE NEWS OF THE DAY.

CONDENSED FOR BUSY PEOPLE.

Short and Interesting Paragraphs that Treat of Men and Things in a General Way.

Mrs. Geo. Merton, one of Guelph's earliest settlers, the having lived there over sixty years, is dead.

Since January last over 8,000 Canadian horses have been imported into England and sold, averaging fair prices.

Word comes from Cornwall that Dr. Rergen continues to improve and good hopes are now held of his recovery.

James Robertson & Co., wholesale woolens of Hamilton, Ont., have gone into voluntary liquidation. The firm is solvent; it will pay a hundred cents on the dollar.

Thomas Craig, who about a year ago escaped from the Goderich prison, where he was undergoing sentence on the charge of forgery, was captured recently at Niagara Falls.

Harley Davidson, of Toronto, the champion skater and cyclist, will accompany his sister, Miss Mabel Davidson, to Europe, where they will give skating exhibitions during the winter.

Hog cholera has broken out in Maiden township. Alex. McFee will lose eighty animals. It is said Mr. Dryden, provincial minister of agriculture, reported the outbreak to the Ottawa authorities.

John Boyd, a well known farmer living near Chatham, Ont., recently fell from a load of wheat and was killed. As he had been in a row a short time previous there is a suspicion of foul play and an inquest has been ordered.

Mr. Macdonald, dairy expert of the local government, returned recently from visiting the dairies and creameries in the northwestern and central portions of the province. All the factories, he says, are doing splendidly.

A Calgary newspaper raises quite a sensation by announcing the arrest of a prominent doctor at the instance of the postoffice authorities for abstracting mail from the postoffice box of a member of the same profession.

A man named Hemickson was smothered to death in a well which he was digging on the farm of Mr. Hewitt, about three miles south of Edmonton. The well caved in covering him up, and before help could arrive to extract him he had died of suffocation.

John Maher, of Colong, was accidentally killed by a team of horses running away. Maher had a load of trunks. After loading he jumped on the rig but only had one tie in his hand, in reaching for the other he slipped and fell under the wagon, the hind wheel passing over his head. He died in thirty minutes.

Intelligence was received at St. John's Nfld., that a Canadian company owning extensive iron mills at Bell Island, near St. John's has been compelled to suspend operations for a year because the American financial question renders it impossible to find a market for the product in the United States. About 300 men are thrown out of employment.

James Connors, M. P. P., and late Liberal candidate in the general election, in Nipissing, has issued civil writs against his successful opponent, James Klock, Rev. P. E. Gendreau, Catholic priest, of Mattawa; S. W. Roy and Robert Klock, of North Bay. The cause is alleged libels published during the campaign and damaged are unabated.

For the first time in the history of Kaslo, the saloons were closed on Sunday by order of his worship the mayor and board of aldermen. It is needless to say anything about results. Comparisons are odious, therefore, however, business in these busy places was pushed on the Lord's day to its full capacity and limit, and its capacity and limit made many fail.

While Campbell Bros. outfit was thrashing at William Widdes' near D. I. orane the other evening, a pile of straw at the engine took fire. Engineer Duncan Angus attempted to drive the engine out, but being overcome, fell or jumped back into the flames, and was so severely burned that he died the following morning. Deceased came from Toronto, Ont., and has two brothers in Minnesota.

In Vancouver the silver question is having a serious effect on commerce and it appears only a short time when an attempt will be made to drive out of circulation American coins. American silver was refused for law stamps, 20 per cent. discount being demanded. The post office refused to take it under any circumstances, while the banks ask a 5 per cent. discount. It is feared that in another week it will not pass as current coin at all unless heavily discounted.

The S. S. Chittazong, of the O. R. and N. Transpacific line, is ashore on Vancouver Island, to the northward of Ten Mile Point. Only her bow is touching and the ship is resting easily, making no water. Her stern is in deep water and it is expected the ship will float at high tide. The accident occurred through a dense fog and the commander being unable to pick up a pilot. She is fully laden with a general cargo and was bound to come for coal before proceeding to sea en route for Yokohama.

A collision between two freight trains occurred at Calgary the other night. A freight from Edmonton had passed the Junction and was nearing the Elbow bridge, when suddenly a special came tearing down. Both whistled. The Edmonton train fortunately was slowing up for water. Both engines were reversed and by strenuous efforts were brought to a standstill, not, however, until the engines struck. Both pilots were smashed, but little other damage done. No blame seems to attach to the men as there is no telegraph station on the C. and E. south of Olds.

A disastrous fire occurred at Sincere a few days ago. The following places were totally destroyed at Hill's livery stable, Archie Hill's livery stable, Chas. Reid, veterinary surgeon, office and stable; Salvation Army barracks and the residence of Wm. Bart. The race horse

Flying Minnie, owned by J. C. Helmer, Aylmer, was also burned. For a time the main portion of the town was threatened with destruction, but the wind was favorable and the brigade did wonders. The total loss on buildings and contents was about \$11,000. Insurance, \$4,500. The race horse was not insured.

Rev. Father Point, of the Society of Jesus, dean of the regular and secular Catholic clergy of Canada, is dead, at Montreal, at the age of 96, being born in France in the year 1800. He was one of the deacons at the coronation of Charles X, the last legitimate King of France, in 1829. Father Point had spent nearly his whole life in missions. For some years he labored in the western peninsula of Ontario. Lately he has resided at St. Mary's college here. In May last he celebrated the 70th anniversary of his ordination. He was in possession of all his faculties up to the time of his death.

ATROCITIES STILL CONTINUE.

Cuba the Scene of Many Dark Deeds Unparalleled in History.

In the many struggles which Spain has waged against her colonies in different parts of the world history does not record any such wholesale execution of war, strictly so called, as that which took place the other day at the order of Valeriano Weyler, captain general of Cuba.

The history of the struggles for independence carried on by Mexico and the various south and Central American republics against the dominion of Spain makes no mention so far as known, of any captain general who ever before gave an order for the execution of so many men captured on the field of battle at one time. Even Valmeseida, surnamed "The Tiger," was never the author of such an order, and did not hesitate to throw the responsibility for the Virginian massacre, where it properly belonged, on the shoulders of Barriel, surnamed "The Butcher," governor of Santiago de Cuba.

Although many citizens of Havana have testified to the regularity with which the sound of small volley fire could be heard coming from the direction of Morro Castle and the Cabanas at sunrise each morning, the reports of executions have been discredited, and usually pronounced false by Captain-General Weyler himself.

Up to the present time General Weyler, in spite of his reputation for severity in the last Cuban revolution, has not seemed inclined to go beyond the usages of civilized warfare in the treatment of political prisoners, and General Martinez Campos was lenient to an extent which aroused the ire of the conservative party, and gave rise to a demand for his retirement as captain-general.

Almost the last words of Campos in reply to those who had criticized his policy of dealing with Cuban prisoners were expressions of regret that party pressure had compelled him to order executions which in his estimation were both impolitic and unjust, particularly as the insurgent leaders had cared for and returned all Spanish prisoners, executing none unless proved to be a spy.

If the Madrid dispatch is correct, General Weyler has not only abandoned his previous policy of adhering to the line of conduct laid down by Martinez Campos with reference to the treatment of prisoners of war, but has rather "out Herod-ed Herod" in returning to the methods of extermination which were in vogue during some of the reigns of some of Cuba's captain generals of the past.

The execution of the men, Cubans, Americans and English, who were captured on the ill-fated Virginias, is the only case, which, in point of numbers, equals the recent executions in Havana. The trials of these unfortunate men seldom lasted more than ten minutes, and fifty-three of them were shot between the 6th and 8th of November, 1895, when the British man-of-war Noble arrived on the scene and put a stop to the wholesale slaughter of men, some of whom were by torture compelled to sign a confession of their own guilt. But this crime against the usages of civilized warfare was not at the command of a captain general of Cuba.

The execution during the ten years' war of eight young medical students in Havana, accused of desecrating a grave in adjoining grounds, aroused the indignation of the world, but even that was consented to by the captain general, only in obedience to the demand of the volunteers of Havana, and not in accordance with a military judgment.

A startling discovery. A special to the New York Press from Chicago says: The discovery of dynamite bombs and other anarchist paraphernalia with correspondence in a north side boarding house has resulted all the exciting scenes of the anarchist agitation of 1893 and 1897. The police refuse to disclose the contents or tenor of the letters discovered pending efforts to capture Joseph Bestman, owner of the stuff. He was last heard from in Dallas, Texas. About ten years ago a man known as Joseph Bestman, anarchist, boarded at No. 18 Sedgewick Court, became in arrears for rent and left the house without a trunk. This was broken open the other day and from the trunk enough explosives were taken to wreck the whole north side of the city of Chicago. Enumerated, thirteen sticks of dynamite, six loaded dynamite crackers, two monster dynamite bombs, primed and fused; some unfinished bombs and one complete gas pipe bomb were found. In addition were four dozen large calibre dynamite cartridges and a large quantity of dynamite paste. The letters discovered in the trunk included correspondence with Albert Parsons, the Haymarket anarchist, executed in 1887, and with Michael Schwab, also of the Haymarket gang, pardoned by Gov. Altgeld.

The Acadia Sugar Refinery Burned. A special to the St. John's, N. B., San from Moncton says: Fire broke out in the char house of the Moncton sugar refinery and before the firemen could reach the place, the upper stories were a mass of flames; nothing could be done and within an hour the flames had eaten into the sugar house, eight stories high, within an hour it was also ablaze. The fall of the heavy machinery sent sparks and sheets of flame a hundred feet above the highest wall. Within two hours only the bare wall was left. There was no wind and the boiler house, office and warehouse were saved. The refinery was owned by the Acadia Sugar Refinery Co., with headquarters in Halifax. It is said to be insured for \$200,000 but the loss will be over that figure. About 150 men were employed. The cause of the fire is unknown.

A SKELETON UNEARTHED.

Believed to Be the Remains of Thomas Scott, the Victim of Louis Riel.

The other evening one of Mr. D. B. McIlroy's men in digging the trench for the wooden pipes in which the telephone wires are to be laid across Main Street, Winnipeg, and along the south side of Portage Avenue to Fort Street, threw up some bones, which soon began to excite the curiosity of spectators. Among those who happened to be in the vicinity were two old timers, Mr. Robert Patterson, who kept a store on the north side of Portage Avenue in the early days, and Sheriff Lukster, who was born a Manitoban, or would have been if the province had come into existence soon enough. The incidents of the first Riel rebellion are still fresh in the memories of these gentlemen; though there have been questions which they, like other people, have never been able to answer. One mystery, which has been pretty nearly given up as past the probability, if not the possibility of solution, has been the query, what became of the body of Thos. Scott, who was shot in 1870, and was supposed to have been buried within the inclosure of Fort Garry. During Governor Archibald's time the grave was opened, and the coffin was found, but it was empty. The questions, who removed Scott's body, and to what place was it taken, have always defied research.

Theories have, nevertheless, been maintained, and one of these now appears to the gentleman who has held it, to have received strong confirmation. Mr. Patterson, whose name has just been mentioned, has all along connected the disappearance of Scott's body with the proprietors of a saloon of those pioneer days, which was known as the Red Saloon, and which stood on the south side of what is now Portage Ave., at the junction with Main Street. The site of the building is now included in Portage Ave., the street having since been widened in that part; and the trench which is now being dug passes through the identical spot. The proprietor of the Red Saloon at the time referred to was a man known by the name of Bob O'Loone; he was afterwards killed in a drunken row in Pembina. O'Loone is credited with having been a Fenian and an annexationist, and one of those who were really to blame for the disturbances rather than the French halfbreeds. Mr. Patterson considers O'Loone to have had more to do than Riel himself with the murder of Scott, and by natural inference more likely than anybody else, to have been concerned in making away with the body. His theory then is that Scott's body was stolen, taken to the Red Saloon and buried there; he was therefore disposed to say without hesitation that the skeleton found was without doubt that of Thos. Scott. Sheriff Lukster appeared to agree fully with Mr. Patterson's view, and to endorse his narration of the facts. Unfortunately the chance of identification of the remains are by no means hopeful. The body was interred without a coffin or box, and there was no trace of clothing or effects remaining. Evidently the remains had been buried a good many years; but only an expert could venture to estimate the length of time.

THEY WISH HIM SUCCESS.

Wm. J. Bryan and His Platform Heavily Endorsed by Hungarians.

A special to the New York World from Buda-Pest, Hungary, says: "The following cable message, signed by delegates to the international agricultural congress, called at Buda-Pest, by the Hungarian minister of agriculture has been sent to the Democratic candidate for president of the United States. To Wm. Jennings Bryan, headquarters of Democratic party, Chicago: 'We, the undersigned members of the international agricultural congress convened at Buda-Pest, wish you success in your struggle against the domination of the creditor class, which during the past twenty-three years has secured in both America and Europe monetary legislation, destructive to the property of your farmers and others.'

"Should you be victorious in November, we pledge ourselves to spare no effort to bring immediate pressure upon our respective governments to co-operate with the government of your great nation in restoring silver to the world's currency."

"We believe that, failing such restoration the gold premium throughout all Asia and South America will continue to rob the farmer, equally in America and Europe of all rewards for his toil and your election may avert from Europe the serious agrarian and social troubles now impending."

(Signed) Louis Alexander Karolyi, president Hungarian chamber of commerce; D. Bandini, president of the Society of Agriculture in Holland; and others.

A White Cap Outrage.

The white caps have created another sensation near Toledo, Ohio, by whipping a man named Huntman, who lives at Holland station, ten miles from there, and burying him alive. The story has only now leaked out although the outrage, according to the police, was committed on September 9. The Huntman was under threats and was afraid to communicate to the authorities the story, but the neighbors learned of the facts and informed the police. The facts, as reported to the police, are that two of the Huntman children coming from the postoffice were picked up on the road by two men in a buggy and accused of stealing a pocket book containing \$8. The next night a party of men came to the Huntman house. After calling Huntman out of bed, seized and dragged him outside and beat him and abused him in a frightful manner. Then they carried him to a grave, and putting him in it, covered him with earth. Then they dug him up and beat and abused him a second time and finally buried him again. Then they dug him up for the second time and again lashed him and then drove away. The two children were also lashed. The affair occurred about midnight.

A New Emigration Society.

A London dispatch says: The United Women's Emigration Association has an appeal in a recent issue of the London, England, Times for funds to facilitate the emigration of respectable women to Canada and other colonies. Lamin dresses, companions, helps, servants, nurses, and shop girls will be forwarded to Canada or elsewhere, according to the demand. Many sent, it is stated, are prospering, and numbers of orphan children have found a happy home in Canada, where they were adopted as real members of the family.

JEALOUS RIVALS.

CANNOT TURN BACK THE TIDE. THE DEMAND FOR DR. AGNEW'S LITTLE PILLS IS A MARVEL.

It's the Old Story. "The Survival of the Fittest" and "Jealousy Its Own Destroyer."

Cheap to buy, but diamonds in quality—banish nausea, coated tongue, water brash, pain after eating, sick headache, never gripe, operate pleasantly. 40 doses in a vial. 10 cents at all druggists.

THE PLOT WAS FOILED.

Five Prisoners of the Kingston Penitentiary Attempt Their Freedom.

The plot of five convicts to escape from the prison of isolation at Kingston penitentiary has been frustrated, and the men placed in a dungeon for safe keeping. The convicts who were implicated were Riddell, of Kingston; Kelly, who escaped last fall, and was recaptured; Buckley, of Toronto; LaFramboise, of Montreal; and the fifth man was from Hamilton. LaFramboise was the leader of the operation, and it was through his assault on a fellow convict that the plot was discovered. When he was searched in his dungeon a knife with saw teeth was discovered in his clothing. The cell was searched, when a ladder made of a cotton sheet, and rope made of pieces of fibre, were found. The other four prisoners had also saw knives. A survey of the cells occupied by the other four revealed an interesting and startling condition of affairs. Fronting the cell occupied by LaFramboise was one unoccupied. LaFramboise had tunneled from his quarters into this. It is expected that he disposed of the earth by throwing it down the closet. A second prisoner had also tunneled into an empty cell. An examination of the bars in the empty cell disclosed the fact that four were sawed through. The plot is the biggest that has been unearthed in the prison for some time.

ADAM'S GINGER BEER.

For Making a Delicious Health Drink at Small Cost.

Receipt—Adams' Root Beer Extract...one bottle Fleischmann's Yeast one half to one cake Sugar...two pounds Cream of Tartar...one half ounce Lukewarm water...two gallons Dissolve the sugar, cream of tartar and yeast in the water, add the extract, and bottle; place in a warm place for twenty-four hours until it ferments, then place on ice, when it will open sparkling, cool and delicious.

The ginger beer can be obtained in all drug and grocery stores in 10 cent bottles to make two gallons.

Mrs. Elmore—I wonder how many steps that new organ of De Smith's has got? Elmore—Only three, I should judge. One for each meal.

One Every Night.

One Laxa-Liver Pill taken each night during 30 days will cure Constipation, oft-returning Headaches and irregular action of the bowels. Laxa-Liver Pills leave no unpleasant after effect.

Her Father—Has my daughter given you any encouragement, sir? Suitor—Well, she said you were always a very generous parent.

Tobacco Heart.

Much heart and weak nervousness is caused by undue use of tea, coffee or tobacco; palpitation, nervousness, irritability, excitability, lack of confidence, etc., are sure symptoms. Milburn's Heart and Nerve Pills bring instant relief, by steadying the nerves and regulating the heart. They are a true heart and nerve food.

"I see they are applying ball bearings to a great many things now. 'Yes, they have a ball bearing sign down where I keep my watch."

Constipation Cured.

GENTS—I was in very poor health for over four years; the doctor said it was constipation. Not wanting to spend too much cash, I got three bottles of B. B. B. and took it regularly. I can certify that I am now in the best of health and feel very grateful to B. B. B.

ALFRED TROUS, Montreal, Que.

As Well as Ever.

DEAR SIR—After suffering for two years from a late indigestion, I tried B. B. B. I took only three bottles, which made me as well as ever I was. I highly recommend B. B. B. to all dyspeptics.

Mrs. JOHN WHITE, Austin, Man.

HOAX—Poor Byness has to run all the errands and cook his own meals. Hoax—What's the trouble? Hoax—He was foolish enough to buy his wife a bicycle.

Dr. Fowler's Extract of Wild Strawberry cures Diarrhoea, Dysentery, Cholera, Cholera Morbus, Cholera Infantum, and all summer complaints and fluxes of the bowels in children or adults.

Mr. Popsleigh—What would you think if I were to tell you that I had been dying by inches for you for years? Miss Watered—I should think it—it was very sudden.

Dr. Fowler's Extract of Wild Strawberry cures Diarrhoea, Dysentery, Cholera, Cholera Morbus, Cholera Infantum, and all diseases of the bowels. Never travel without it. Price 50c.

First clerk—She's a married lady. Second clerk—How do you know? She ordered two Hammocks.

GUIDE TO WINNIPEG, MANITOBA, TERRITORIES. RAILWAY AND STEAMSHIP TIME TABLES, MAPS, ETC. Published by STOVES' DIRECTORY Co.

I THINK RICHARD'S PURE SOAP IS THE BEST IN THE WORLD.

WHAT DO YOU THINK?

Return 20 wrappers taken from Richard's Pure Soap to my address and receive a handsome Souvenir; 12 wrappers for your choice of 150 books of fiction, by popular authors. Useful books free on application.

Address D. RICHARDS, Woodstock, Ont.

and it can be made to give such splendid healthful warmth that you'll hardly require an overcoat all season—just by seeing that it is interlined with Fibre Chamois. No weight or bulk will be added, but the natural stiffness and spring of this interlining will keep the garments in their proper shape, and its perfect non-conducting properties will keep out every breath of frosty air or damp winds, while the waterproof Rigny process makes it proof against all day's rain or sleet storm. Wonderful value at light expense. Only 25c a Yard. Don't buy any ready-made garments which haven't the Fibre Chamois Label—you'll thoroughly enjoy the comfort it gives.

A FATHER'S STORY.

HAPPINESS RESTORED WHEN HOPE
HAD ALMOST GONE.

His Daughter began to Droop and Fade—
Was Attacked With Hemorrhage and
Lose Was Despaired of—She is Again
Enjoying Robust Health.

From the Bradford Courier.

A recent addition to the Grand Trunk staff in this city is Mr. Thomas Clift, who is living at 75 Chatham street. Mr. Clift, who was formerly a policeman in the great city of London, is a fine looking specimen of an Englishman of the type so often seen in the Grand Trunk employ and who make so desirable citizens. Since his advent here he has been a warm advocate of the well known medicine, Dr. Williams' Pink Pills, and through his endorsement, dozens of boxes have been sold to his friends and acquaintances.

A Courier representative, anxious, although not surprised to know the reason for Mr. Clift's warm eulogy of the pills, called on that gentleman recently. Mr. Clift willingly consented to an interview, and in the following story told his reason for being so sincere an advocate of a world renowned medicine. "Some five years ago," said Mr. Clift, "my daughter Lily began to droop and fade, and became disinclined either for work or pleasure. A doctor in London was called in and he prescribed exercise and a general 'toning-up' as the best medicine to effect a cure. My daughter did her best to follow his instructions, but the forced exercise exhausted her completely, and she gradually grew worse. One night I and my wife were terribly alarmed by a cry from Lily, and hastening to her room found her gulping up large quantities of blood. I rushed for a doctor and he did his best to stop her hemorrhage, but admitted to me that her case was very critical. She dropped away to a veritable shadow, and for weeks when I went to bid her good-bye in the morning as I went to my work I feared I might not see her alive again. This went on for a long time until one day a friend recommended my daughter to try the effect of Dr. Williams' Pink Pills. She consented to do so and in a comparatively brief period a decided benefit was perceptible. She persisted with the use of the pills and gradually rose from a bed of suffering and sickness until she once again attained robust young womanhood. For the last three years she has been in excellent health. It was Pink Pills that virtually brought her from the month of the grave and preserved for me my only daughter. Now do you wonder why I sound their praises and recommend them at every opportunity?"

Dr. Williams' Pink Pills strike at the root of the disease, driving it from the system and restoring the patient to health and strength. In cases of paralysis, spinal trouble, locomotor ataxia, sciatica, rheumatism, erysipelas, scrofulous taints, etc., these pills are superior to all other treatment. They are also a specific for the troubles which make the lives of so many women a burden, and speedily restore the rich glow of health to pale and sallow cheeks. Men broken down by overwork, worry or excesses, will find in Pink Pills for Pale People a certain cure. Sold by all dealers, or sent postpaid on receipt of 50 cents a box, or six boxes for \$2.50, by addressing the Dr. Williams' Medicine Co., Brockville, Ont., or Schenectady, N. Y. Beware of imitations and substitutes alleged to be "just as good."

WILL AID THE CUBANS.

A Balloon That Will Drop Dynamite on
the City of Havana.

Cuban sympathizers are considering the introduction of a new feature into the war now being waged by the Cuban insurgents for their liberty. It is proposed to construct a steerable balloon of sufficient size to carry a ton or so of dynamite. With such an airship the city of Havana could be reduced to ruins within an hour, the celebrated trocha would become a memory, and Spanish rule on the Pearl of the Antilles would be a thing of the past.

A. R. Reed, a resident of Hot Springs, Ark., is the inventor of the balloon when it is proposed to use. His plans follow old lines to a large extent, but he has introduced a new feature into the propelling device and steering machinery. He declares that he can make his airship go where he pleases, even turning around in circles in an ordinary wind. He would be unable, he says, to do more than hold his own in a race, but it is thought that it can be avoided and the balloon can wait for favorable atmospheric conditions before being put into actual use. The balloon consists of a gas bag shaped like a cigar. Underneath is suspended the usual basket for the aeronaut. Under the basket is a cylinder 30 or 35 inches in diameter, and somewhat long as the gas bag. In one end of the cylinder is placed a rudder, which, the inventor says, can be controlled from the basket by ropes. In the center of the tube and directly under the basket is a fan which will create a strong draught that is calculated to keep the balloon in motion as well as permit the rider to change the direction of progress at will. The rotary fan in the center will be propelled by means of a gasoline engine in the basket. The engine is to be made of aluminum, and will be connected with the fan by means of a direct belt. The size of the gas bag will determine the balloon's carrying capacity. Mr. Reed says that within a few days he can construct a balloon which, he is confident, will carry two men and a ton of dynamite, and can be propelled wherever it is desired to go. Such a vessel could drop over Havana, and in a few hours set on fire dynamite in the city to reduce it to ruins. No apparatus would be necessary for firing the bombs. They could be dropped with sufficient accuracy, and the concussion would cause them to explode. The Cuban junta, it is said, has been considering the feasibility of Mr. Reed's invention.

In Northern Manitoba.

Rev. L. W. Wood, who has just returned from the northern shores of Lake Manitoba, gives an interesting description of life in that rather out-of-the-way region. Fishing and stock raising are the pursuits of the people, who are mostly contented, and live a good life. The fishing is done in summer with nets, and in winter through holes in the ice. The latter is a very cold

NIPPED IN THE BUD.

A Couple of Daring Thieves Caught Red-
Handed on a Steamer.

Passengers on the steamer New York, which arrived the other day at New York had an exciting trip. They discovered on the third day out that an organized attempt to loot their trunks in the baggage compartment had been nipped by the arrest of Under Steward William Hyde and Fireman Patrick Moran, who made the rest of the voyage in irons. They discovered too, though the American line officials naturally endeavored to withhold any information about the matter, that the locks of a number of rooms had been forced and a hatchway unfastened. This started a rumor of a scheme by a gang of thieves to rob the passengers, and the arrest of Hyde and Moran increased the rumor. It was found a number of trunks had been rifled, and it was reported a gang of New York sharpshooters had got aboard and induced one of the bed room stewards to join them. The amount of property stolen was carefully kept from the passengers, and everybody was uneasy. Moran was caught coming out of the baggage room and got company in irons by giving Hyde away. He said Hyde suggested the robbery, and they cut a hole in the partition and got a lot of valuables together from numerous trunks. Moran being left in charge of it.

"When Hyde left," said Moran, "he promised to be right back with some food and water, for I was mighty hungry. I waited there in the baggage room a night and two days, but Hyde never came near me. I was almost starved to death and the thirst nearly drove me crazy. At last I peeped out and saw Hyde, happy as a porpoise. That was one too many for me, and so I popped out and they nab me and I told the whole thing."

Hyde denies his guilt, though First Officer Rodgers, sworn in an affidavit, at the police station at New York where the men were taken that Hyde had confessed.

Among these whose trunks were rifled was J. Darling, one of the team of Australian cricketers. A diamond presented to him by the Prince of Wales was taken but was returned to him. The cricketers and other passengers believe there must have been an organized gang of thieves aboard.

"I can't believe," said one of the cricketers, "that two such fellows as Hyde and Moran could have been capable of carrying out so audacious and difficult a scheme unaided."

The police think some who were aboard as passengers were in the conspiracy and really its prime movers. The American line for some months and the officials are happy in the belief that they have caught the offenders.

THOUGHT TO BE MURDERED.

Great Anxiety Felt as to the Fate of Can-
adian Missionaries in Tibet.

It is feared that missionary Rijnhart, of Toronto, and his wife, formerly Dr. Snie Carson, of London, who were laboring in Tibet, have been murdered. When Mr. Rijnhart was in Toronto he established a missionary paper, and since he went to Tibet he has corresponded regularly.

The last letter received from Mr. Rijnhart was dated Jan. 11th, 1896, at Kumbum, which is in the province of Amdo, in the northeastern part of Tibet. The country was then in the hands of the rebels. They had an army of 200,000 and were devastating towns and villages on all sides. Against this army the Chinese emperor had sent an imperial force of 6,000 men, which was completely annihilated by the rebels. Mr. Rijnhart, when on his way to Tibet, had arranged to send letters by courier to the nearest point touched by the postal service, so that even if he were alive at the present time it is likely that he would, owing to the rebellion in the country, find it impossible to forward his letters. His friends fear that the cablegrams announcing his murder by the rebels are correct, and they are under the impression that owing to the medical training possessed by his wife, which was doubtless well known to the Tibetans, through being used in their behalf, that they would spare her life in their own interests, and that the information about her abduction by the rebels is also true. As the country is wild and difficult of access, it may be a long time before any intelligence of the ill-fated lady is obtained.

Mr. Rijnhart was not married to Miss Carson until he had undertaken to walk from Toronto to Vancouver in his evident desire to visit Tibet as a missionary.

DESTITUTE JAPANESE.

Another Earthquake and Flood Cause
Great Damage and Loss of Life.

Press advices by Empress of India report serious earthquake disturbances and floods throughout the northern provinces of Japan, involving the destruction of upwards of 10,000 houses, the loss of several hundred lives and much distress among the survivors. The government has inaugurated a systematic plan of relief.

The city of Kobe, Japan, was nearly wiped out by a disastrous conflagration on Aug. 26th, and floods and storms and earthquakes, caused the loss of 2,500 lives and the destruction of millions of dollars worth of property in northern Japan.

The steamer Doria, from the Orient, brought news of a series of catastrophes that have befallen the Mikado's realm, which are unprecedented in its history. In Gifu prefecture, 4,300 homes were blown down and along the Haji Gwa, 400 persons lost their lives. The most severe storm occurred on Aug. 23. Along the Ishikawa, 81 lives were lost. The great flood was preceded by severe earthquakes. Then followed a downpour such as has never before been experienced on the islands. The European residents were panic-stricken and sought shelter on the high lands. The Minagawa overflowed its banks at midnight of the 26th inst., and the water inundated streets and fields, sweeping away 300 houses, and drowning 200 persons at Kobe. After twelve hours work the broken embankments were repaired by sand bags. To make the fate of Kobe worse, a fire broke out late in the evening and fanned by the high wind spread over the entire city. One thousand nine hundred houses, were destroyed totally, and twelve houses, two police boxes, one fire brigade station, four temples and one theatre.

THE WESTERN WORLD.

ITEMS SHORT AND INTERESTING.

A Resume of the Events of the Week—
Prominent People, Their
Sayings and Doings.

It has been arranged that Col. Otter will hold the annual inspection of the 90th battalion on Oct. 22.

As anticipated by Capt. Corfield, the steamer Chittagong came off Ten Mile Point at high tide, not badly damaged by the accident, though weeping in her forward compartments.

Information has been received at Vancouver that the British India steamer Navigation company of London will establish a line between New Zealand and Vancouver. The first steamer, the Avonca, will shortly leave New Zealand.

Another fatal shooting accident is reported from the Pacific coast. An Indian named Thomas Baker, aged 29, while hunting at Howe Sound set his gun on the ground. By some means it went off, the charge entering his body at the armpit. The poor fellow paddled all the way to Vancouver in a canoe but died in a few hours after he got there.

The telephone lines in the Kootenay mining country, British Columbia, have been taken over by the C. P. R. Co's. Telegraphs, and now form part of that company's extensive system. Rates have been reduced to \$1.20 day and \$1 night, and the service greatly improved. Rossland, Nelson, T. A. and Kaslo are now exclusively C. P. R. offices.

Laurence McKenny, a picturesque veteran of the early Cariboo days has passed away. Mr. McKenny was the first man to take a seat in the stranger's gallery at the parliament buildings of British Columbia, and was ever afterwards known as No. 1. Another affectionate term applied to him was "Big Larry." The late Mr. McKenny was one of the best known men in British Columbia and although he had a successful mining career he died at the Old Men's home, Kamloops.

A factory for making salmon cans will be erected in Vancouver with a capacity of turning out all the cans needed in the salmon industry there. The company is organized with a capital of \$300,000, the directors being chiefly San Francisco capitalists. A marine railway and dry dock which will be able to handle all lumber ships and most steamers arriving at that port will be constructed by English capital. The site has been chosen near the sugar refinery and the money has been raised.

The Bella Coola colony in British Columbia is progressing. The colonists, young and old, number 240 souls, fifty-five of whom are in the party. There are no complaints coming from the party. It is expected that in another year the colony will be self sustaining though at present the male colonists have to hire themselves out by the day during some of the months. Poultry and pigs are doing well and there are no complaints coming to the ears of the government.

The Vancouver Eastern Railway Co. is proposing a railroad in almost a direct line to Rossland district through a rich mining country. The company are marvellously near being able to carry through what they propose. The completion of the project will bring the famous mines of the interior close to the coast, and make the Winnipeg route to Rossland a comparatively long one. The new route will be across Hope Mountain through Pentecost, across Kettle River, and through Washington street to Rossland. It will bring the ore nearer Vancouver smelters than any of the American routes and will bring ore dealers to the coast in touch with the interior. The Kootenay want the Crown's Nest pass road for it means to them cheap coal, a priceless boon; but cost cities are not over anxious for the road that would help out Winnipeg and the east at their expense.

Impossible to Discriminate.

The anti-Mongolian petitions of British Columbia are receiving an immense number of signatures. It seems as if everyone was in favor of it, but they are most of them only in favor of the principle involved. They realize that it is impossible for Canada to discriminate against Japanese immigrants on account of the Japs being classed by Great Britain as a favored nation—and further that if Canada attempts to place a prohibitory tax on Chinese that England would at once interfere and disallow it. The thinly populated province of British Columbia must suffer for the good of the nation, but the antagonism against Chinese is growing and serious results may follow if legislation is not enacted.

At the anti Chinese meeting at Westminster it was stated that if something was not done soon, that Japanese would run the outside of the canneries and Chinese the inside. The large increase of Japanese fishermen has excited the alarm of white labor. And an effort is being made to induce the government to allow none but born British subjects or provincial voters to fish for salmon. Something must be done at once, say those that are interested, to check the evil and save the industry from the danger that threatens it.

Strange Story of Impersonation.

A queer story has come to light at Windsor Ont. A few days ago a young lady and an elderly gentleman called on the city clerk and asked to see the marriage records for the month of July. The names Jacob Madery, age 25, and Jennie Hiorns, age 22, of Detroit, were found registered as having been married by Rev. J. R. Gundy. The young lady said she was Miss Hiorns, but had never been married to Madery, and in fact had never been in Windsor before. She said Madery had kept company with her, but she had never encouraged his attentions. He was absent a few days, and on his return demanded "his wife." Of course some women must have impersonated Miss Hiorns. Last night the two came across to see if she could be identified as the woman who was married and as soon as they landed Madery was arrested on a charge of perjury. His friends declare he was tricked over.

Arthur—Are you sure she loves you? Jack—Yes. When I told her I had no money to marry on she asked me if I couldn't borrow some.

NOWHERE ELSE ON EARTH.

Calumet, Mich., the Only Place on Earth
Where Men Work One Mile Underground.

Philadelphia Record: A French engineer proposed last year to the directors of the international exposition to be given in the French capital in the year 1900, the digging of a hole to the depth of one mile. The idea was favorably received, but on investigation, magnitude of the undertaking became so apparent that the idea has been dropped. It will therefore be necessary for those who desire to descend a mile into the bowels of the earth, to come to Calumet, for nowhere else on earth are there available openings of such depth. Within less than a mile of each other in this mining town there are three vertical shafts, each nearly one mile in depth. The deepest of this trio is the Red Jacket shaft of the Calumet and Hecla copper mine, which has reached its full depth of 4,900 feet. Five Eiffel towers could be dropped down this hole were it wide enough, and the top of the fifth would reach above surface only to such a height as would allow it to be easily covered by the steel shaft house now being built over this monstrous hole.

This shaft was begun in 1880 and it has taken seven full years to sink it, showing an average progress of 700 feet annually, nearly all of which has been in blue trap rock, one of the most refractory of minerals. The conglomerate carrying copper was the bed of an ancient sea, and is composed of pebbles and gravel worn by the action of the water, such as are seen on sea beaches or lake shores, cemented into a solid mass by calc and silica. By the percolation of the waters and the decomposition of certain constituents of the rock little cavities were formed in which were deposited small nodules of copper by the water.

The Red Jacket shaft is fifteen and one-half by twenty five feet in size inside of the timber, and contains six compartments, being fully open in working capacity to half a dozen mining shafts of ordinary size. The shaft is solidly timbered. The adamantine firmness of the rock renders it secure for all time to come, the timbering being merely to carry the traffic of man and mineral, of water and electricity, which surges between the sunlight and the bottom. In four compartments will slip up and down the ponderous cages, carrying ton-loads of rock at the speed of an express train. Up and down these cages will also ride the men who mine the rock from the old sea bed. In one compartment will be the great iron pump pipes, and down another descends the steady current of compressed air which runs the drills a mile below the engine house. Bunched in the slender cables are the copper wires which convey electricity to light the recesses of the mine, threads of wire that afford telephonic communication from the most remote drift to any other portion of the property, for the Calumet and Hecla has a telephonic exchange of its own which in size and equipment puts to the blush the facilities of many pretentious towns, and which reaches every office on the surface, and every portion of the great mine. There are fire alarm wires too, for the Calumet and Hecla spares no cost to make its employees as safe as skill and lavish outlay of money can render them.

The sinking of this shaft possesses deep interest from a scientific standpoint. Observers ascending to great heights in balloons have been able to secure data of surpassing importance regarding meteorological conditions, and observations made at the depth of a mile afford positive information. The Red Jacket shaft has shattered some of the deeply cherished theories, and their arex books now extant in the higher institutions of learning that must be overhauled because the facts have succeeded theory. The mines of the Comstock lode in Nevada were the deepest in the world. The mines were very hot, and on some of the deeper levels some of the more pious miners were quite positive that they smelled sulphur and refused to go further down for fear of encroaching upon the domains of the devil. According to deductions, the bottom of the Red Jacket shaft should be about the proper temperature to boil eggs. Careful tests have determined that the normal temperature of the rocks is 87.4 degrees Fahrenheit at the bottom. The rock temperature at the depth of 105 feet was 59 degrees Fahrenheit, showing an access of 28.6 degrees in 4,785. There was, however, a gain of about eight degrees in temperature in the last 500 feet sunk, a much more rapid increase than at lesser depths.

Notwithstanding the beneficial effects of ventilation and compressed air, the men working at the bottom of the shaft do not have an especially easy berth, though liberally paid. They are compelled to wear rubber boots and rubber coats, as the water in the mine at that great depth is most corrosive to the human body. There is machinery enough on the surface to drive all the street cars of a city like St. Louis at this single one of eleven shafts, and it is housed in fire-proof buildings that would be the pride of a city of 100,000 inhabitants.

Successful Sinking Machine.

The first test of Octave Chanut's "Albatross" sinking machine, invented and constructed by William Paul, was made at Millers Ind., last evening, under favorable conditions. While the machine was heavily loaded with ballast to prevent it flying any great distance and anchored by four strong ropes, each 200 feet long, there were three points which the trial was to decide—first as whether it would leave the chute; second, whether it would right itself in the air; third, whether when it commenced to descend would it move downward slowly or alight easily. These were all determined in a manner gratifying both to the inventor and to the owner. The flight was less than 100 feet but the descent and final alighting on the sand was as graceful and even as those of the bird from which the machine is patterned.

High and Low Church Disagree.

The following poster was one of many that simultaneously appeared in many and various places of a conspicuous character in Kaslo, B.C.:
"\$15 Reward—Stolen! Stolen! Whereas certain church property was stolen from the English Church, Kaslo, on Sunday, September 6th, between the hours of 6 p.m. and 7 p.m., the above reward will be given to any person whose information will lead to the conviction of the offender. Address Rev. W. S. Akehurst, Nelson, B.C."

This, it seems, is the latest development and basis of a grand row between the

high church and low church parties. The former are headed by Messrs. Allen and Huxton, while the latter are generally by Messrs. Twin and Keen. The conflict has been long and bloody, over rubric and ritualistic tendencies and practices, hovering around the cross. This is the article in question. The Brood people do not want the actor adorned with either cross or symbol of any kind, while the high do therefore the one party does and the other undoes. This is the second cross that has been removed, with above result. It is hard to say how the difficulty will be settled, for while the thorax is in the wound will not heal.

A Boiler Locomotive Wrecked.
The monster of a ninety ton wheel locomotive on the Big Four railroad burst at Pekin, Ill., the other evening, hurling the enormous engine over 100 feet, partially demolishing a large factory, killing the fireman and breaking nearly all the glass with a quarter of a mile of the scene of the accident. Pieces of the engine were picked up 1,000 feet away. One of the big drive wheels was hurled 400 feet from the track. James Long, the fireman, was thrown many feet in the air, and had an iron bar driven through both legs above the knee. He was terribly scalded and died in a few minutes. The engine was standing 100 feet from the Cummins Hooper works when the explosion occurred and 150 feet of the wall of the building was crushed. No one was at work in the building or there might have been fatalities.

Ladies are fond of Elegance in Underwear

and she who understand the virtues contained in a fine pure wool article, exquisitely finished, will buy the "Health Brand," both for herself and her children. Every doctor in the Dominion, says, do not wear underwear with cotton in it—do not wear anything but fine, soft, pure wool next your skin, which will not irritate and will absorb.

"Health Brand"

Has been before the public now for seven years and every day, the list of those who wear it, has been added to, until we can count thousands who won't wear anything else but this. If you study your health, your comfort and your safety. Ask for the "Health Brand"

For sale by J. P. Beauchamp.

Local and General

—The Virden Banner is in the hands of the bailiff.

—Mr. Adams, of Touchwood, left Regina for England last week.

—Wanted—a girl to do general house work. Apply at this office.

—S. R. Edwards and T. J. Scott drove up from Indian Head on Monday.

—Dr. Seymour and wife, Fort Qu'Appelle, were in town on Tuesday.

—J. Lindsay, of Moosomin, was in town again this week and took a trip to the lakes.

—The McMichael Bros. have commenced work with their two threshing outfits.

—Mrs. Smith's sale of household property has been postponed until Saturday, at 2 p.m.

—Sharps are swindling farmers in Northwestern Manitoba, says the Pilot Mound Sentinel.

—Col. Herchmer and Dr. Burnett, Regina, are in the west purchasing remounts for the force.

—BEAVER Plug is the highest grade and richest flavored chewing tobacco made. Try it.

—A PRINTER with a small capital will hear of something to his advantage by applying at this office.

—Miss L. M. Montizambert, General Corresponding Secretary W.A., was a guest of Mrs. J. H. Boyce last week.

—One of the gentlemanly proprietors of the Leland was seen one day last week hunting for a stray wheelbarrow.

—W. Sutherland, M.L.A., North Qu'Appelle, went to Regina Tuesday morning to attend the opening of the assembly.

—J. P. Beauchamp and G. S. Davidson spent a few days shooting at the lakes recently and report good bags of game.

—"Don't be deceived." Insist on getting the genuine TONKA Smoking Mixture; 10 cents a package or 1/2 pound tin.

—Members of the football club are earnestly requested to attend the meeting in Mr. Bulley's store to-morrow night at 8 o'clock.

—It is currently reported that Levi Thompson, of Wolseley, has been appointed crown prosecutor vice Wm. White, of Moosomin.

—S. Hewitt, of Grenfell, lost his house and contents by fire on the 21st ult. He and his son escaped through a window. Cause of fire unknown.

—A. H. B. Sperling's threshing and engine have undergone a thorough overhauling and on Wednesday started in to thresh S. Gibson's splendid crop.

—Messrs. W. Vatcher, F. Fessant and C. Hamilton have returned from Touchwood, where they have been for some time. They are as merry as ever.

—H. F. Boyce, of the College Farm, finished threshing his crop of over 4,000 bushels No. 1 hard last week, averaging over forty bushels to the acre.

—Wheat is turning out well in this district—in fact, much better than some expected. The sample threshed so far registers No. 1 hard and cannot be beaten. G. Needham delivered at the elevator last week 1,000 bushels, for which he received 51c. On Monday 52c was paid, and from all appearances it is likely to go higher, so that farmers here will do well to keep a little cool. There is no wheat in

the country that will surpass the sample grown in this district this year.

—When are the Spencerville races coming off?

—J. Fisher, of the Queen's, attended the races at Grenfell yesterday.

—W. H. Bell returned from Rossland, B.C., this week, and will be remaining here for a short time.

—T. J. Scott has organized a lodge of the Sons of Scotland here, with Dr. Carthew medical examiner.

—A letter to a friend announces that Mr. Evans, nephew of J. P. Jones, arrived safely in England on the 16th ult.

—Messrs. White, Atkins and Whitham, of Winnipeg, accompanied by Hitchcock, of Moose Jaw, bagged 150 geese in two days at Buffalo Lake.

—An Indian named Baptiste, from the reserve at File Hills, has been arrested for killing cattle. Const. Rudd took him to Regina yesterday, where he was committed for trial.

—Among the passengers on Monday evening's train were R. Johnston, W. J. Davidson and Rev. Mr. Ritchie, for Winnipeg; Wm. Kirkland, Deep Lake, for England.

—Major McGibbon, Inspector of Indian Agencies, returned last week to Regina after an extended tour of inspection to the agencies of the north. He reports everything in a most satisfactory condition.

—W. W. McDonald, ex-M.P., met with a serious accident on Wednesday evening last week, near Mr. Geo. Young's, three miles east of Moosomin, his team running away and Mr. McDonald having his leg broken.

—Beware of all U.S. bills bearing the picture of Wm. Windome. There are none genuine of that denomination, they being the production of a gang of counterfeiters, who are raising the \$2 bill to \$10. Watch for them when getting payment or change from strangers.

—Angus Cameron, of Virden, while attempting to cross the track under a freight train it started before he could clear himself and he had his right leg horribly mangled and left foot crushed. The mangled limb was amputated and Mr. Cameron is doing as well as could be expected.

—McPhee and Kiser's dramatic and specialty company opened a one night's engagement here Tuesday and was greeted with a good house. The performance was first class in every respect. The company consist of first class artists, noticeably Mr. and Mrs. McPhee, who in their lines are unexcelled. Should the company ever again visit Qu'Appelle, they will be warmly welcomed by a big house.

—Prairie fires last Wednesday week did considerable damage south of town. H. Payne lost about 300

bushels of wheat and Geo. Brigham 125 bushels. The wheat was in stock, the fire running across the stubble. Jacob Young also lost a quantity of hay. W. Kirkland, of Deep Lake, lost three horses by the same fire. The horses were enclosed in a large field.

—W. C. Boyce, nephew of Mr. J. H. Boyce and traffic manager of State railways, Central India, is visiting relatives here. He arrived last Thursday and is very much pleased with this country. He intends visiting the U.S. and also several other points of interest on this side of the line. The grain in this country he pronounces superior to any in India.

—On the urgent request of Bishop Anson and with desire of the Executive Committee of the Synod, the new Bishop of Qu'Appelle has decided to leave for England about the middle of October to attend to urgent business on behalf of the diocese. His Lordship will probably not be able to return until August, 1897, on account of the Pan-Anglican conference, which meets at Lambeth, June, 1897.

Bad Advertising.

The man who says he doesn't believe in advertising, and refuses to use the newspapers for that purpose, generally advertises in some way or other. Hotel registers, theater programmes and such things are likely to have his ad in them. Then he charges what he pays in space in them to charity or to profit and loss, and goes on sweating that advertising doesn't pay. There ought to be a Keeley Institute or an hospital for the treatment of this class of lunatics, and if some enterprising man will start one, we will tell him where to find patients enough to fill it in about fifteen minutes.—Brains.

Bad Blood Between Them.

The ever-slaving farmer's wife, her delicate sister in the city, suffer more than they care to tell. The dark rings round the eyes, headaches, dizziness, palpitation or rheumatic twinges, betoken a run-down system. The blood is poor and is a bar to the enjoyment of life. Scott's Sarsaparilla purifies the blood, strengthens and vitalizes the system, and speedily restores the bloom of health to the cheeks. It cures when all others fail.

Prompt Payment.

The following letter speaks for itself:

REGINA, N.W.T.,
Sept. 21st, 1896.

J. G. Morgan, Esq.,
Manager New York Life Ins. Co.,
Winnipeg.

Sold everywhere. They Wear like Iron.

Oatmeal Cakes

Very few persons in this country know what an excellent and delicious article of food can be made from oatmeal when baked into cakes. A man who uses oatmeal cakes will not readily become hungry, he will always be healthy, and will always have a good color and good teeth, but the cakes must be prepared by someone who knows how to make them to perfection.—Pilot Mound Sentinel.

The Portage la Prairie Review gives publicity to the statement that a number of postmasters and other government officials in Manitoba are to be removed from office. The Review instances two cases in particular, viz. Dr. McFadden and Mr. Varden, postmasters at Neepawa and McGregor.

Dr. Rutherford announces that he will not be a candidate for Lakeside at the approaching bye-election in that constituency. A convention of Liberals to elect a candidate to represent Lakeside in the local legislature, was held in Portage to-day.

WHEN RUN GET BUILT UP.

That's our advice to every weakly, sickly, ailing woman and girl, and there's nothing equal to INDIAN WOMAN'S BALM for purifying the blood, & toning up the nerves and building up the health.
